Data by Weekday & Shifts

Revenue by Shift

Revenue by Shift

Remarkably balanced across all three shifts - each contributes equally (~33%)

This even distribution suggests consistent demand throughout the day

Total Revenue By Weekday

View by Shift

Afternoon

Morning

Night

Revenue by Day of Week

Highest Revenue Days: Tuesday (12.1K), Monday (11.2K), Friday (11.1K)

Lowest Revenue Days: Sunday (9.0K), Saturday (9.9K)

Midweek performs strongest, with a 25% drop-off on weekends
This suggests a business/commuter customer base rather than leisure

Data by Coffee Type

Revenue by Coffee Type

Gross Profit per Coffee Type

Coffee Type Performance

Americano with Milk is the revenue leader but Cocoa has the highest profit margin
Espresso has the lowest revenue despite being a café staple
High-margin items (Cocoa, Cortado) generate less volume but better profitability per unit
Milk-based drinks dominate sales but have slightly lower margins due to ingredient costs

The Overall Trend Shows

April = Lowest Point (3.5K) - The business starts at its weakest

Gradual Growth Through Summer - From May (5.0K) → September (7.1K)

Peak in Fall/Winter - October hits 10.2K (nearly 3x April!)

Strong Q1 - February (8.7K) and March (10.2K) are the strongest months

Seasonal Cycle - Clear pattern of growth from spring through fall, peaking in late winter/early spring

Key Insight: The business shows a **positive upward trajectory** from its low point in April, with the strongest performance in **October, February, and March** (8.7K-10.2K range).

Strategic Recommendations

1. Address Seasonal Revenue Fluctuations

Problem: April-June shows 40-50% revenue drop compared to peak months

Solutions:

- Launch **iced coffee menu** for spring/summer (cold brew, iced lattes, frappes)
- Introduce **seasonal promotions** in April-May to combat the slump
- Add **refreshing alternatives**: lemonade, iced tea, smoothies
- Create **summer loyalty program** with bonus points during slow months
- Consider **outdoor seating** if possible to attract warm-weather customers

2. Maximize High-Margin Products

Strategic Focus: Emphasis should be placed on profitability rather than volume alone.

Recommended Actions:

- Cocoa (88.9% margin) should be actively promoted through specialty variations including mint, caramel, and spiced options
- Cortado (87.7% margin) promotion is recommended, with customer education about this premium offering
- Americano (80.9% margin) should be featured as a simple, high-profit, quick-preparation option
- Bundle strategies are recommended, such as "Cocoa + pastry" combo deals
- Barista training programs should be implemented to enhance upselling of high-margin items during the ordering process

3. Boost Weekend Sales

Performance Gap: Weekend sales currently underperform by approximately 25%.

Recommended Initiatives:

- Saturday/Sunday specials should be introduced, featuring a "Weekend brunch menu" with food pairings
